

## POLY COATED U-BOLTS

The Step-Ko Products polyolefin coated u-bolts are superb for eliminating problems caused by corrosion or vibration of steel piping or plastic piping for the oil and gas, industrial and water/wastewater industries. Available in sizes through 36", the poly coated u-bolts come complete with 4 nuts each and are available in plated and galvanized coatings. Each poly coated u-bolt is available with support pads made of buna rubber or half round and full round thermoplastic pads.
